Placement and Operation

For best results the unit should be placed in a central location and three feet or higher from the ground.

Operation is very simple. Remove the Air Fantastic from the packaging. Place in desired location, plug it in and rock the switch to the on position. The unit can remain in the on position 24/7.

Optional Cleaning

Make sure that the power cord is unplugged prior to cleaning.

**Base and Honeycomb** - We recommend wiping with a dry towel to remove dust and build up.

**Aluminum Shell** - We recommend using stainless steel/aluminum spray on polish or multi-surface cleaners. Make sure the polish or cleaner is recommended for use on aluminum.

**Internal** - Take dry cloth and wipe inside the shell and around the aluminum brackets and the ballast or spray with compressed air.

**NOTE:** Use compressed air only to clean AFION Cell. Any removal of catalyst coating will decrease the effectiveness of your unit and void the warranty.
